PROFILE

I am a Computer Science graduate passionate about software development, data analytics, artificial intelligence, and building practical technology solutions. I enjoy learning new technologies, solving problems, and turning ideas into functional applications. I am looking for my first IT or software-related role where I can keep learning, ship useful features, and take ownership of well-defined problems.

EXPERIENCES

Intern / Junior Developer, 03/2026 - 04/2026

MyNaga App, Naga City

- Designed and developed core CRUD functionalities for the MyNaga web application using React and Next.js, significantly improving local case management and user engagement.
- Collaborated with MyNaga development team to translate civic requirements into technical specifications, facilitating effective mapping of citizen concerns to city offices.
- Engineered standardized PDF export feature for official case reports, enhancing layout for clean, print-friendly distribution.

PROJECTS

AI-Driven Synthetic Data For Low-Resource Machine Translation: Enhancing Rinconada-to-English Translation

- Developed a back-translation pipeline to generate synthetic Rinconada-English data, successfully expanding training sets to address data scarcity in low-resource machine translation.
- Implemented and deployed a functional Streamlit-based translation prototype using the best-performing model, receiving positive domain expert evaluation ratings across fluency, accuracy, and adequacy.

AI-Driven Cloud Threat Intelligence Platform

- A cloud-native, real-time Threat Intelligence and Security Operations Center (SOC) platform powered by machine learning. It features automated telemetry ingestion, an Isolation Forest anomaly detection engine, interactive threat analytics, and active IP mitigation capabilities.

EDUCATION

Camarines Sur Polytechnic Colleges

Bachelor of Science in Computer Science

San Miguel, Nabua Camarines Sur

2021-2026

SKILLS AND INTERESTS

- Language : Python, Typescript, Javascript, SQL
- Frontend: React, Next.js, Tailwind CSS,
- Backend & Databases: Node.js, REST APIs, Supabase, PostgreSQL, MySQL
- AI, ML & Data: OpenAI, PyTorch, Hugging Face, Pandas, NumPy, Excel
- Development & Deployment: Git, GitHub, Vercel, Render, VS Code
